<b>Office Action Summary</b>	Application No. 10/766,342	Applicant(s) LAWSON, JAMES DONALD	
	Examiner Kurt Fernstrom	Art Unit 3714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-4 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. While processes are one of the four categories of patentable subject matter enumerated above, it does not necessarily follow that all processes are patentable. The test for determining whether a method is patentable is whether it has a useful, tangible and concrete result. See *State Street Bank & Trust Co. v. Signature Financial Group Inc.*, 149 F. 3d 1368, 47 USPQ2d 1596, (Fed. Cir. 1998). The present invention fails the last two portions of the test; that is, it lacks a tangible and concrete result. The claims are directed to a method for determining compatibility between persons. Such a method inherently involves a substantial amount of subjectivity. There are no objective, repeatable standards for determining whether two people are compatible, or even what it means to be "compatible". The invention essentially amounts to a manipulation of abstract ideas, and as such is not patentable.

Furthermore, patentable subject matter is that which is in the "useful", i.e. technological arts, and which serves as an advancement in technology. See *In re Waldbaum*, 173 USPQ 430 (CCPA 1972). The present invention lacks patentable subject matter for this reason, as there does not appear to be any technology involved

Art Unit: 3714

in the creation or use of the method. As a result, the claims are rejected under 35 USC 101.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Regarding claim 1, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d). The term "preferred embodiment" also renders the claim indefinite, for similar reasons. With respect to claims 1-4, broad recitation of a method for performing certain steps is not sufficient to define the scope of the invention. Distinct, specific method steps for carrying out the method must be recited in the claims.

***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent

Art Unit: 3714

granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Buckwalter. The claims, as understood, are directed to a method of determining compatibility comprising filling out questionnaires and comparing people's questionnaires using a series of scales. Buckwalter discloses a method having these limitations.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ghaly, Moore-Ede, Shapira and White disclose various devices and methods for determining compatibility.
